FIRE PROTECTION

YOU CAN COUNT ON THAT

For more than 20 years, we have been a recognized expert in the creation of fire protection concepts. You can rely on our publicly appointed surveyors and experts for your project. It is our passion to develop a conclusive concept together with you, which is both sustainable and economically reasonable.

YOU CAN RELY ON THIS:

- Coherent and economically-justifiable concepts
- Local presence and experience of our fire protection concept experts
- Independent and neutral assessment of costs and quality

PILLARS OF THE FIRE PROTECTION CONCEPT

PREVENTIVE FIRE PROTECTION:

- Structural fire protection
- Plant-related fire protection
- Organizational fire protection

DEFENSIVE FIRE PROTECTION:

- Active and passive measures taken by fire brigades and other emergency services before and during a fire
- Fire brigade plan

DEFINED PROTECTION GOALS OF THE FIRE PROTECTION CONCEPT MUST BE ACHIEVED

ADDITIONAL FIRE PROTECTION SERVICES

➤ Fire brigade plan

➤ Escape and rescue plans:

- Preparation of escape and rescue route plans according to DIN 4844-3
- According to industrial safety guidelines

➤ Consulting services:

- Planning of fire protection measures
- Evaluation of structural defects
- Consulting by interdisciplinary engineering teams (architecture, environmental protection)
- Explosion protection
- Cost optimization
